CUSTOM MADE PROSTHETIC COVERS CATALOGUE 2021-2022

INT MOVEMENT WE PRINT MOVEMENT

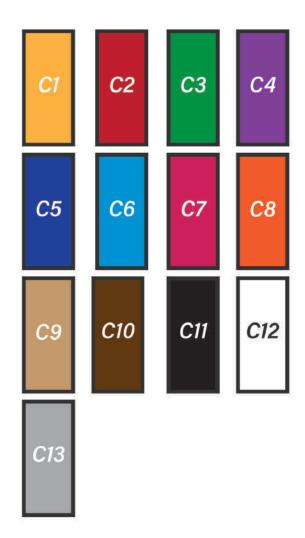

ORTHODESIGNS.

OrthoDesigns provides custom made cosmetic covers for prosthetic users. Each cover is unique to the user and is made according to their prosthetic componentry and alignment.

The manufacturing process of the cover is:

- We receive the scan, which includes the prosthetic and sound leg of the user along with the measurement form.
- After we confirm the scan is correctly taken, we proceed to designing the cover.
- We fully design the cover from scratch based on the patient's scan, therefore achieving the best look possible.
- After we receive a confirmation from the patient about the cover design, we then proceed into 3D printing the cover.
- 3D printing allows us to manufacture the cover while producing minimal waste when compared with traditional manufacturing methods.
- Then the cover goes through our detailed finishing stage, which provides the final look of the cover!

AVAILABLE COLOURS

You can have any colour from the above in the following finishes:

- Anodized matt
- Glossy
- Marbleizing (combination of 2 colours in a marble effect!)
- Chrome finish (single colour/shiny silver)

^{*} Enjoy the ancient Greek names for each of the cover!
